DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 8 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claim 8, line 2, recites "the sampling line is coupled to the multiple outputs...", and in claim 9, lines 14-19 recite description of the multiple outputs of the first delay device. Hence, claims 8 and 9 recites delay line 106 in Fig. 1 having multiple outputs. However, the specification does not describe to convey to one skilled in the art of how the delay line 106 is coupled to the EX-OR gate, wherein the first input of the EX-OR gate is coupled to the last output 104 of the delay line 106, on the other hand, the specification does not describe which among the multiple outputs are connected to the second input of the EX-OR gate, thus does not describe in the specification in such a way as to enable one skilled in the art.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2611

2. Claims 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. . In claim 8, line 2, recites "the sampling line is coupled to the multiple outputs...", and in claim 9, lines 14-19 recite description of the multiple outputs of the first delay device. Hence, claims 8 and 9 recites delay line 106 in Fig.1 having multiple outputs. However, the claim fails to particularly point out and distinctly claim to convey to one skilled in the art of how the delay line 106 is coupled to the EX-OR gate, wherein the first input of the EX-OR gate is coupled to the last output 104 of the delay line 106, on the other hand, the specification does not describe which among the multiple outputs are connected to the second input of the EX-OR gate, thus fails to particularly point out and distinctly claim the subject matter.

Allowable Subject Matter

3. Claims 4-7, 11-14 and 18-23 are allowed.
